

# TCT Carbide Router Bits

TCT Carbide router bits offer premium micro-grain carbide tips that provide a stronger, sharper cutting edge, reducing wear for a longer tool life. Each carbide tip is induction brazed with silver solder for a strong bond, then precision ground and balanced. Heat treated, fully hardened bodies prevent breakage or bending under stress. Anti-kickback design for maximum safety. Kickback occurs on initial starting cuts, making the bit jump.

ROUTER BITS

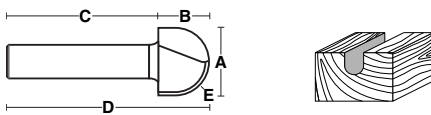

## Chamfering Bit

Cut decorative edges and conceal joints.

(A) OVERALL DIAMETER	(B) CUTTING LENGTH	(C) SHANK LENGTH	(D) OVERALL LENGTH	(E) CUTTING ANGLE	SHANK SIZE	TUBED PART NO.	STD. PACK
